EDUCATION

Pontifícia Universidade Católica de
Minas Gerais - PUC Minas, Minas
Gerais, BR

Control and Automation Engineer
Bachelor's Degree 2014-2020

Pontifícia Universidade Católica de
Minas Gerais - PUC Minas, Minas
Gerais, BR

Software Engineer
Postgraduate Degree 2020-2021

CORE SKILLS

Domain & Experience: Agile
Testing, Test Automation, BDD,
E-commerce, Legal, Microservices,
Web & Mobile

Test Automation: Python, Java,
JavaScript, C#, Selenium, Cypress,
Rest Assured, NUnit, Cucumber, Git,
MongoDB, PostgreSQL,
ElasticSearch, Azure DevOps, GoCD

Non-Functional Testing: Load
Testing, JMeter, K6

Management & Reporting: JIRA,
Quality Metrics, Documentation,
Power BI, Data Studio, Scrum

PROFESSIONAL SUMMARY

Since 2021, in the software testing area, a bachelor's degree in Control and Automation Engineering, with a specialization in Software Engineering, and experience with manual and automated testing of web, API, and microservices. I currently work as a QA Engineer. My main activities are planning and executing manual tests, developing automated tests within the context of Continuous Testing, and actively participating in process improvements in the Squads where I work.

EXPERIENCE

SENIOR QA ENGINEER

ENHESA | PORTUGAL-HYBRID | MAR 2024 - NOW

- Design and implement automated testing strategies for web applications and APIs.
- Develop and maintain automated test suites using C#, TypeScript, NUnit, and Playwright.
- Execute and automate API testing workflows using Postman.
- Manage test plans, test cycles, and defect tracking using JIRA Zephyr.
- Validate end-to-end integration between backend and frontend systems.
- Analyze and extract quality metrics to drive continuous improvement in the SDLC.
- Contribute to CI/CD quality processes, ensuring automated tests support reliable deployments.

QA ENGINEER

KWAN | PORTUGAL-HYBRID | SET 2022 - MAR 2024

- I was assigned to external clients(Enhesa)
- Carry out a thorough analysis of the quality specifications and technical documents of the projects.
- Define functional and non-functional testing plans, taking into account business expectations and project demands.
- Perform manual and automated tests, using best practices and appropriate tools, to identify and mitigate errors in the software.
- Work together with the team, following the agile model, to align test scenarios with business expectations.
- Actively collaborate in optimizing processes, seeking continuous improvements, and ensuring software quality.

QA ANALYST

CI&T | BRAZIL-REMOTE | JAN 2022 - MAR 2023

- Define and maintain test strategies and test plans for APIs and frontend applications within e-commerce environments.
- Collaborate with different cross-functional Agile teams to evaluate sprint quality, identify risks, and propose improvement actions.
- Design end-to-end (E2E) testing flows aligned with critical user journeys in e-commerce platforms.
- Develop and maintain automated test suites using Rest Assured, Cypress, and Python.
- Create action plans and quality initiatives to continuously improve product stability, release confidence, and team efficiency.
- Promote automation best practices and help integrate automated tests into the development and delivery workflow.

JUNIOR RPA DEVELOPER

BASE2 TECNOLOGIA | BRAZIL - REMOTE | DEC 2020 - APR 2021

Worked as an RPA Developer, designing and implementing Python-based automation solutions to streamline and optimize internal business processes. I focused on identifying automation opportunities, developing reliable scripts and workflows, and improving operational efficiency by reducing manual tasks and minimizing errors. My work contributed to increasing productivity and enabling teams to focus on higher-value activities.

JUNIOR DEVELOPER

ELOGROUP | BRAZIL - REMOTE | JAN 2020 - NOV 2020

- Worked as an RPA and Chatbot Developer, building automation solutions to improve operational efficiency and digital interactions. I developed RPA workflows using the Automation Anywhere platform to automate repetitive business processes, reducing manual effort and increasing process reliability.
- In parallel, I designed and implemented chatbot solutions using the IlhaSoft PUSH platform, creating automated conversational flows to enhance user experience and streamline communication with internal users and customers. My role involved analyzing business needs, designing automation logic, and delivering scalable solutions that improved productivity and service responsiveness.
